Protection Column
with deflection mirror

Z2SU001

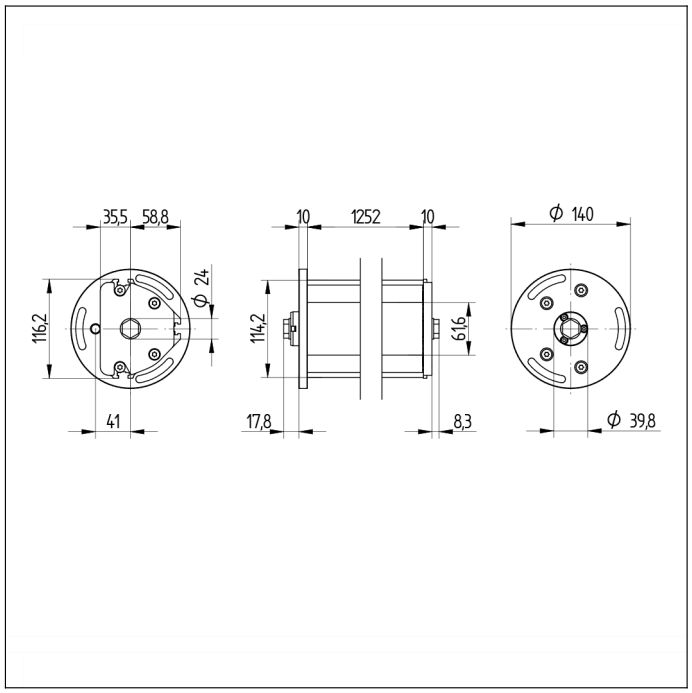

Mechanical Data	
Housing Material	Aluminum, powder-coated
Housing Material	Plastic, PA
Housing Material	Plastic, PE
Optic Cover	Glass
Mounting Space (EBR)	1252 mm
Suitable Mounting Technology No.	710

- **Effective protection against mechanical damage**
- **Flexible installation: install on the ground or walls**
- **Integrated slot for muting sets**
- **Simple alignment via innovative mounting feature**

The protection column for deflection mirrors provides secure protection against bumps, collisions and machines. Mirror columns are used in connection with safety light curtains or safety light arrays. They direct the beams from emitter to receiver along multiple sides of a system or machine. This can be used to efficiently secure entire areas with just one safety device. A free-standing setup is possible using the type ZMBSZ0001 floor mounting. The type ZMBSZ0002 wall mounting is suitable for horizontal setups.
