

High-Resolution Lens for machine vision camera

ZVZG003

Part Number

- Adjustable aperture
- Adjustable focus
- Fixed focal length lens with C mount threaded connection
- For image chips with small pixel sizes of $3.45 \times 3.45 \mu\text{m}$

High-resolution, fixed focal length lenses with C mount threaded connection can be used, for example, on Machine Vision Cameras with C mount connection. They're especially well-suited for image chips with minimal pixel sizes. Adjustable aperture values and adjustable focus offer the greatest possible variability for perfect image recordings.
