

Release notes for ABB Interface Seam Tracking 2.1.0

Version 2.1.0

Previous version none

Release date 12.11.2020

Description ABB Interface Seam Tracking

The software add-on permits communication between a uniVision application DNNF012 and a robot for seam tracking applications. In this way, a 2D/3D Profile Sensor can be used with a uniVision application for seam detection and tracking in realtime with a robot.

This interface supports:

Manufacture: ABB

Controller: IRC5

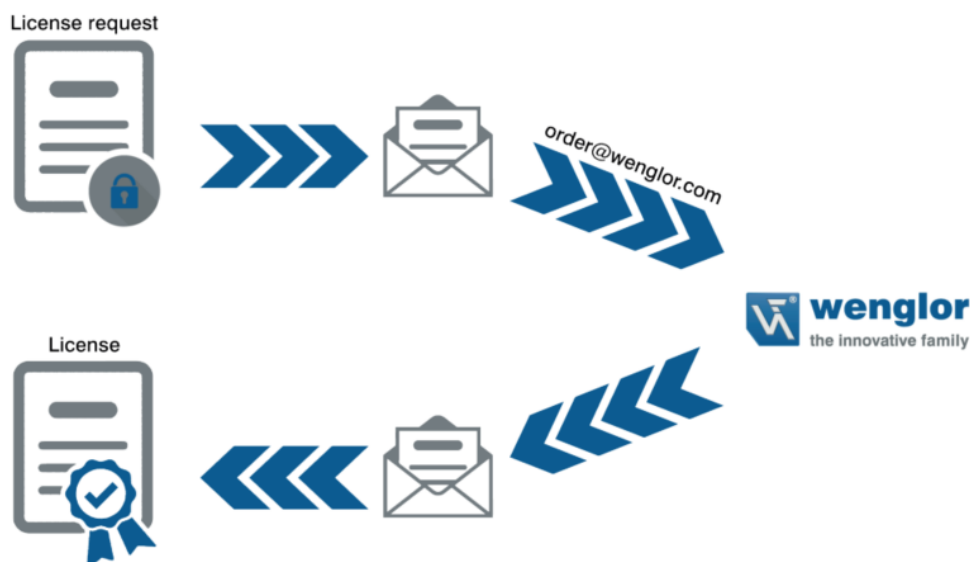

Software RoboWare 6.0 or later

One of the software options should be installed:

- Sensor Interface
- Optical Tracking CAP
- Optical Tracking Arc

Remark:

The software must be now licensed before use via the common license process:

The menu entry is placed in the Help menu:

The article number of the license is DNNP010.
