

Release notes for ShapeDrive SDK 1.5.1 for C++

Version 1.5.1

Previous Version 1.5.0

Release date 17.03.2022

Software description

The ShapeDrive SDK is the software development kit (SDK) for the easy integration of ShapeDrive sensors in user applications.

Programming example in programming languages

- C++

Example projects for development environments

- QT

Supported operation systems

- Windows 7 (x64) or Windows 10 (x64)

Caution

Caution: To use some of the new features a ShapeDrive sensor at least firmware version 1.1.0 AND hardware version 3.5.3 is needed!

Bug fixes

Bug description	Solution
It is not possible to connect several ShapeDrive sensors to one IPC	Fixed, several sensors can be now connected to the same IPC.
