

2D/3D Profile Sensor

MLZL171

Part Number

weCat3D

- Compact and robust format (IP67)
- Easy integration
- High profile quality for high process reliability
- Integrated cooling/rinsing
- Optional integrated data evaluation for tracking point determination

Fully automated welding places great demands on quality and precision. Consequently, the correct position of the respective seam must be reliably detected before the welding process is started in the robot cell. Welding systems are equipped with innovative weCat3D 2D/3D profile sensors for the purpose of weld seam tracking.
