

Polarization Filter for LBAxxxx bar light

ZBAG105

Part Number

Technical Data

Optical Data

Beam angle	$\pm 7^\circ$
Polarization Filter	yes

Mechanical Data

Housing Material	Plastic, ABS
Housing Material	Plastic, PC
Housing Material	Plastic, PVAL
Housing Material	Plastic, TAC

- Long service life
- Operates with infrared illumination

wenglor ZBAG0xx are optical accessories for the LBA bar lights. They are small optical diffusers that increase the beam angle emitted from the bar light. This allows the user class leading flexibility from a single light source. The angle changers allow the user to create a variation of light outputs on a single product, enabling patented lighting techniques such as the curve effect. The angle changer widens the beam angle of the LBA bar lights up to the specified value of the opening angle stated in the datasheet.

Complementary Products

LBA, LBO, LBL bar light
