

Angle Changer, Transparent for LBAxxxx bar light

ZBAG005

Part Number

Technical Data

Optical Data

Beam angle	$\pm 7^\circ$
Polarization Filter	no

Mechanical Data

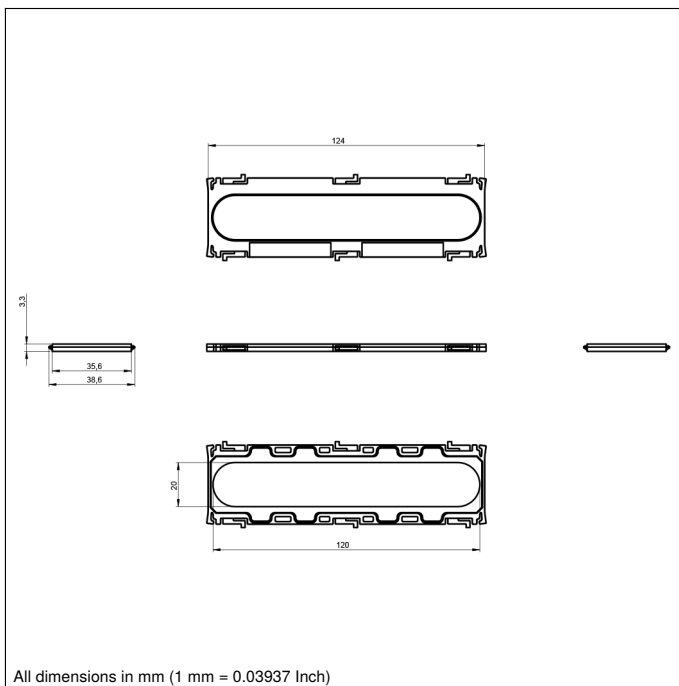

Housing Material	Plastic, ABS
Housing Material	Plastic, PC
Housing Material	Plastic, PVAL
Housing Material	Plastic, TAC

● High-performance tool for creating the curve effect

The ZBAG005 is an optically clear window that allows nearly 100% of the light to pass through it. It can be used in combination with other ZBAG angle changers to have a variable light output along the length of a single LBA bar light. This will allow you to create the curve effect.

Complementary Products

LBA, LBO, LBL bar light
