

Contrast Sensor

P1PW003

Part Number

- Contrast mode
- Innovative display unit for simple diagnosis
- Intuitive operating concept
- Teach-in key and external teach-in
- Very high contrast resolution

These contrast sensors work with a white light LED emitter and an RGB receiver. They reliably detect all color and brightness combinations between the contrast marking and the background. The intuitive operating concept with the LED bar graph display and the well-conceived functions simplify initial start-up and make the sensors suitable for flexible use. The contrast sensors can also be parameterized via IO-Link. Extensive condition monitoring functions are also available for predictive maintenance and trouble-free operation.
