

Firmware BBVK

Release Notes

Compatibility

The firmware version number consists of three digits (e.g. Firmware MVC 1.0.0).

- Major release: The first digit is changed (no compatability).
- Feature release: The second digit is changed.
- Bugfix release: The third digit is changed.

The following applies with regard to the compatability of the device website:

- At a bugfix release, the settings of the device website are unchanged.
- At a feature release upgrade (second digit increases), the settings of the device website remain.
- At a feature release downgrade (second digit decreases), it is possible that the settings of the device website are set back to default.

NOTE!

- A backup of the device settings for the device website is done when the device settings change at a firmware update or downgrade (contains maximum one backup file).
- Contact the wenglor support team (Email to support@wenglor.com) in case of activating again the settings of the device website on a compatible firmware version.
