Laser Distance Sensor
Time of Flight

P1PY004 LASER

Part Number

PNG smart der wintec.

- **2 mutually independent switching outputs**
- **Interference-free towards gloss in the background with wintec**
- **No mutual interference with wintec**
- **Reliable in case of glossy objects with wintec**
- **Secure detection of black objects also in extremely inclined positions with wintec**

These sensors have scratch-resistant optics and the emitted light can be switched off. They use the transit time measurement principle to measure the distance between the sensor and the object.
wenglor interference-free technology (wintec) has revolutionized sensor technology:
It makes it possible to mount several sensors directly next to, or opposite each other without the sensors influencing each other. The sensors reach a very high switching frequency and use laser class 1, which is safe for the human eye.
