## Flat Dome Light Infrared, 300 × 300 mm

**LFDI301** 

Part Number

- Easy and flexible installation
- High homogeneity
- High performance: high intensity even in continuous mode
- No external control required

The LFD series flat dome lights are high-diffuse lights with a camera connection. Due to their intense luminous flux and high homogeneity, they are perfectly suited for large-area applications such as robot-assisted pick-and-place. They can be used in continuous mode or synchronized with the machine vision camera in strobe mode via PNP or NPN inputs. The light is characterized by its narrow edges (4 mm) and easy mounting thanks to the T-slot fastener and the anchor point around the housing. Cameras can be connected easily on the rear of the light.
