

Please read this short manual before updating the IO-Link Master USB EFBL003 to a new firmware.

Please use the firmware only for the EFBL003!

- 1) Connect the USB Master with the original delivered USB-cable to your computer. Please make sure that the power supply is also connected to the master
- 2) Start the firmware-file as administrator (right click on fw-file, run as administrator)
- 3) Enter settings

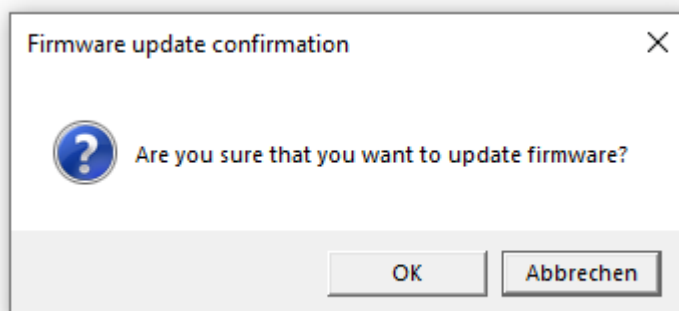

- 4) Make sure that the correct COM-Port / USB is selected

- 5) Then press “Connect” or the “Connection Symbol”

- 6) Confirm the alert window

- 7) Wait until the green progress bar is at 100%
- a. Do not disconnect the IO-Link Master until the update is finished!

- 8) The update should finish with the following alert window
