

IR Blocking Filter for Z60F

Z60G001

Part Number

Technical Data

Mechanical Data

Mounting type, device-side	Magnet
Material	ABS
Optic Cover	Glass

- **Minimizes interference from ambient light**
- **Quick and easy replacement**

IR blocking filters block infrared light without discoloring the image. They are recommended for use in applications with white light and color where there may be interference from IR light. The filter is fixed in the lighting module without the need for tools and remains perfectly positioned when the protective tube is used, even when cleaning results in vibration or accidental movement.
