

Fork Sensor

P1HJ101

Part Number

- 2 switching outputs and switching status indicator
- Detect extremely small parts starting at 0.7 mm
- Flexible cable outlet with 4-pin plug, M8 × 1
- Miniature design (20 × 40 mm)
- Sensitivity set via IO-Link 1.1

Fork sensors in a miniature design are photoelectric sensors. The emitter and the receiver are positioned opposite each other in a housing as a barrier. As soon as the light beam is interrupted, the sensor's output switches. The use of visible red light and the beam marking on the fork legs make it easier to align the fork sensor. This fork sensor can be used to detect small holes, grooves and notches as well as to detect small parts. The minimal construction volume, the flexible connection cable and the integrated mounting holes enable use in confined installation situations, such as shuttles, AGVs or robot grippers.

Technical Data

Optical Data

Fork Width	9 mm
Smallest Recognizable Part	0,7 mm
Light Source	Red Light
Service Life (T = +25 °C)	100000 h
Max. Ambient Light	10000 Lux
Repeat Accuracy	0,05 mm

Electrical Data

Supply Voltage	10...30 V DC
Supply Voltage with IO-Link	18...30 V DC
Current Consumption (U _b = 24 V)	< 20 mA
Switching Frequency	1900 Hz
Switching frequency (speed mode)	3000 Hz*
Response Time	0,26 ms
Response time (speed mode)	0,16 ms *
Temperature Range	-30...60 °C**
Temperature Drift	< 10 %
Number of Switching Outputs	2
Switching Output Voltage Drop	< 2 V
Switching Output/Switching Current	100 mA
Residual Current Switching Output	< 50 µA
Short Circuit Protection	yes
Reverse Polarity Protection	yes
Overload Protection	yes
Protection Class	III

Mechanical Data

Setting Method	IO-Link
Housing Material	Plastic
Optic Cover	Plastic
Full Encapsulation	yes
Degree of Protection	IP67
Connection	M8 × 1; 4-pin
Cable Length	150 mm

Safety-relevant Data

MTTFd (EN ISO 13849-1)	4838,37 a
